- Photos may not have been or be entered in any other contest.
- Photos must accurately reflect the subject matter and the scene as it appears. Photos digitally altered beyond standard optimization (e.g., overly altered or filtered) will not be chosen. Sepia and black-and-white photos are acceptable.
- A completed entry form must be submitted for each photo entered online. Incomplete entry forms will not be accepted.

- A child entering as a Budding Artist must provide date of birth on the entry form.
- All photos submitted become property of California Farm Bureau.
- California Farm Bureau may, without offering any consideration to or obtaining the further permission of its submitter, use any submitted photo for any purpose, such as publishing it in *Ag Alert*® newspaper or *California Bountiful*® magazine, posting it on its websites or social media, reproducing it for Farm Bureau organizational use, or selling it at a county Farm Bureau auction.
- All decisions by California Farm Bureau as to the interpretation of these rules or the judging of photos are in its sole discretion and final.

Photos requirements and preferences

- **Preferred file size is 8-10 MB, but not less than 6 MB.** For more information, see “Image quality” below.
- Images from mobile devices may be submitted if they adhere to the resolution requirement (see “Image quality” below).
- Turn off the date stamp option on your camera. Photos on which a date stamp or photographer’s name is visible will be disqualified.
- All photos must be in .jpg format.
- Images not meeting these specifications will be disqualified.

Image quality:

- Submitted photos should at a minimum be 300 dpi at 10 inches wide.
- Set your camera or mobile device to the highest image-quality setting. High-resolution settings may vary depending on brand, so check the documentation that came with your device. To ensure print standards and quality, submit images as high-resolution files. If shooting in RAW, export as a high-resolution .jpg (300 dpi) via your image-editing software.
- Resolution may be calculated by multiplying the pixel width of the image by the pixel height. For example, a photograph taken with a 6-megapixel camera set for highest resolution and best quality produces images of about 2832 pixels by 2128 pixels, which are acceptable under the rules ($2832 \times 2128 = 6$ million pixels). Digital images must be of sufficient resolution to reproduce well on the printed page.

What is the entry deadline?

Entries must be entered online by September 30, 2022.
